

22<sup>nd</sup> December 2021

**Subject: PRICE LIST INCREASE – PVDF range**

Dear Customer,

Our Product Management Team recently updated you on the possible color change in the supply of our PVDF products, due to the ongoing crisis on raw materials and the need for new suppliers to secure the business continuity.

Due to the drastic cost increase applied by the suppliers, **starting from orders to be received from February 1<sup>st</sup> 2022** a price increase will be applied on the range as follows

- PVDF pressure pipes +8%
- PVDF socket welding fittings +12%
- PVDF valves +9%

Due to the difficulties in securing materials for our running business, we will push back on any speculative orders, thanks for your understanding.

We will keep you updated on the situation regarding the availability of PVDF raw material, we are taking the best possible countermeasures and are working strenuously as always, to keep to a minimum the impact on you in the future.

We remain at your disposal for any clarifications

**Gianmarco Robles**
